SOCIOLOGY, BA
MAY 2012

EXPERIENCE

UCF & UPENN CODING BOOTCAMP
TEACHING ASSISTANT

ORLANDO, FL / REMOTE
AUGUST 2018 - PRESENT

- Introduce software development concepts to students, with a focus on HTML, CSS, JavaScript, React, Node, Express, MySQL, and MongoDB
- Support class lessons and host office hours to provide one-on-one tutoring and host focus sessions on agile methodology and JavaScript ES6 concepts.

CENTRALSQUARE TECHNOLOGIES
SOFTWARE DEVELOPER I

LAKE MARY, FL
APRIL 2019 – MARCH 2020

- Resolved high priority support requests for production bugs in government financial software such as incorrect payroll calculations or tax report creation through code and data changes.
- Designed, coded, and tested new features written in Genero, VB.Net and C# such as the ability for employees to have dollar or percent-based deductions in their paychecks.
- Retrofitted custom code from previous versions of software to latest versions to allow customers to upgrade to software.

QUALITY ANALYST I

MAY 2018 – MARCH 2019

- Authored and executed test cases in VSTS to ensure software requirements are met and identify bugs during each sprint and regression period.
- Served as scrum master, facilitating sprint and daily stand up meetings while working with product owners to identify and remove impediments.

APPLICATIONS

HACKER NEWS CLONE

<https://hacker-news-react-clone.netlify.app>

Fetches data from the Hacker News API to display the top and new stories, comments, and user profiles. Toggle between a light or dark theme.

Technology: React hooks, React Router, Context, Lazy Loading.

GITHUB REPO BATTLE

<https://github-repo-battle-2020.netlify.app>

Retrieves all the top repositories from the Github API, allowing users to view by language. Enter Github usernames to put two users in a head to head battle.

Technology: React, React Router, data caching, and custom hooks.

STUDY SMART

<https://study-smart-app.herokuapp.com>

Allows users to set detailed learning goals, schedule and view study sessions in a monthly or weekly calendar. Save a list of resources to study and track your progress.

Technology: React, React-Bootstrap, Node.js, Express, MongoDB and Mongoose, Passport
